

Anybox Ltd Accessibility Conformance Report

Revised Section 508 Edition

(Based on VPAT® Version 2.5Rev)

Name of Product/Version:

EPS Preview 1.3.5 (build 42)

Report Date:

October 2026

Product Description:

A macOS app that adds Quick Look previews and Finder thumbnails for EPS and PostScript files. It has three parts: a settings window (setup instructions, settings, license and About panes), a Quick Look preview extension, and a thumbnail extension with no user interface. Requires macOS 13 or later on Apple silicon.

Contact Information:

hi@anybox.ltd, <https://anybox.ltd/eps-preview>

Notes:

EPS Preview substantially conforms to WCAG 2.0 Level AA and Revised Section 508 as a native macOS app. Gaps are in secondary text contrast, text sizing, keyboard access to one link and the Quick Look license overlay, one misnamed button, unlabeled app icons, and the accessibility of previewed file content. Each is described in the tables below.

The Quick Look window, Finder and System Settings belong to macOS and are outside this report. So are the vendor website and the third-party checkout used to buy a license. The content shown in a preview comes from the user's own EPS or PostScript file. That format cannot carry alternative text or document structure, so the app cannot add what the file does not contain.

This edition reports on WCAG 2.0. The vendor also evaluated the additional Level A and AA criteria in WCAG 2.1 and 2.2, and those results are available from the contact above.

Evaluation Methods Used:

Self-evaluation by the developer, who knows the product's functions and workflows. Methods used: review of the application source code and interface definitions against each criterion; inspection of the accessibility tree that VoiceOver reads, for every pane of the settings window, the license activation sheet and both preview modes; programmatic measurement of the system text colors the app uses, in light and dark appearance; and manual keyboard-only testing with Full Keyboard Access on macOS 27, covering every pane, sheet, menu and the Quick Look preview. WCAG criteria are applied to native software following the W3C guidance on applying WCAG to non-web software (WCAG2ICT).

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standards/guidelines

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.0	Level A (Yes) Level AA (Yes) Level AAA (No)
Revised Section 508 standards published January 18, 2017 and corrected January 22, 2018	(Yes)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.

- **Partially Supports:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not Applicable:** The criterion is not relevant to the product.
- **Not Evaluated:** The product has not been evaluated against the criterion. This can only be used in WCAG Level AAA criteria.

WCAG 2.0 Report

Tables 1 and 2 also document conformance with Revised Section 508:

- Chapter 5 – 501.1 Scope, 504.2 Content Creation or Editing
- Chapter 6 – 602.3 Electronic Support Documentation

Note: When reporting on conformance with the WCAG 2.0 Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the [WCAG 2.0 Conformance Requirements](#).

Table 1: Success Criteria, Level A

Notes: EPS Preview is a native macOS app, so answers are given for Software. Web, Electronic Docs and Authoring Tool do not apply: setup instructions are built into the software.

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A) Also applies to: Revised Section 508 501 (Web)(Software) 504.2 (Authoring Tool) 602.3 (Support Docs)	Web: Not Applicable Electronic Docs: Not Applicable Software: Partially Supports Authoring Tool: Not Applicable	Software: Every control has a text name, including the icon-only button that removes a device activation. The app icon at the top of the Home and About panes and the activation sheet is exposed as an unnamed image. In the default PDF preview mode, text in the file is exposed to VoiceOver. In transparent-background mode the preview is announced as "Preview of" plus the file name. Graphics inside an EPS file have no text alternative because the format cannot carry one.

Revised Section 508 Report

Chapter 3: [Functional Performance Criteria \(FPC\)](#)

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Partially Supports	The settings window and license sheets can be used fully with VoiceOver. The About pane's help button is announced as "Alert", and app icons are unnamed images. PDF previews expose the file's text. Graphics in the file have no text alternative. See 1.1.1 and 4.1.2.
302.2 With Limited Vision	Partially Supports	The app follows dark appearance and works with macOS Zoom and display scaling. Secondary text falls below 4.5:1 contrast in light appearance, and text does not follow the macOS Text Size setting. See 1.4.3 and 1.4.4.
302.3 Without Perception of Color	Supports	Color is never the only way information is shown.
302.4 Without Hearing	Supports	The product uses no audio.
302.5 With Limited Hearing	Supports	The product uses no audio.
302.6 Without Speech	Supports	The product needs no speech input.
302.7 With Limited Manipulation	Partially Supports	Every function in the app works from the keyboard, with Full Keyboard Access, and with Voice Control through named controls. One link in the setup steps and the Quick Look license overlay's buttons cannot be reached with Tab. See 2.1.1.
302.8 With Limited Reach and Strength	Supports	The product needs no simultaneous actions, timed actions or physical reach.
302.9 With Limited Language, Cognitive, and Learning Abilities	Supports	The window has four short panes with numbered setup steps, in nine languages. Activation starts automatically once a full key is entered. See 3.2.2.

Chapter 4: [Hardware](#)

Notes: Not Applicable. EPS Preview is software only, so the Chapter 4 table has been removed.

Chapter 5: [Software](#)

Notes: EPS Preview is built with Apple's standard AppKit and SwiftUI controls, so it exposes its interface through the macOS accessibility API.

Criteria	Conformance Level	Remarks and Explanations
501.1 Scope – Incorporation of WCAG 2.0 AA	See WCAG 2.x section	See information in WCAG 2.x section
502 Interoperability with Assistive Technology	Heading cell – no response required	Heading cell – no response required
502.2.1 User Control of Accessibility Features	Supports	The product does not change or override any platform accessibility setting.
502.2.2 No Disruption of Accessibility Features	Supports	The product does not interfere with VoiceOver, Zoom, Full Keyboard Access, Voice Control or other platform features.
502.3 Accessibility Services	Heading cell – no response required	Heading cell – no response required
502.3.1 Object Information	Partially Supports	Controls expose name, role, state and value. The About pane's help button is named "Alert", and app icons are unnamed images.
502.3.2 Modification of Object Information	Supports	Editable states, such as switches, can be changed through the accessibility API.
502.3.3 Row, Column, and Headers	Not Applicable	The product has no data tables.
502.3.4 Values	Supports	Switch states and the license key field's text are exposed.
502.3.5 Modification of Values	Supports	Values can be changed through the accessibility API.
502.3.6 Label Relationships	Supports	Switches are linked to their visible labels.
502.3.7 Hierarchical Relationships	Supports	Window, sheet, section and control hierarchy is exposed.
502.3.8 Text	Supports	Text content, including text in PDF previews, is exposed.
502.3.9 Modification of Text	Supports	The license key field uses a standard editable text field.

Criteria	Conformance Level	Remarks and Explanations
502.3.10 List of Actions	Supports	Controls expose their standard actions.
502.3.11 Actions on Objects	Supports	Actions can be performed through the accessibility API.
502.3.12 Focus Cursor	Supports	The focused element is exposed.
502.3.13 Modification of Focus Cursor	Supports	Focus can be moved through the accessibility API.
502.3.14 Event Notification	Supports	Standard controls post focus, value and window change notifications.
502.4 Platform Accessibility Features	Supports	The product works with the macOS accessibility features, including Sticky Keys, Slow Keys and Mouse Keys.
<u>503 Applications</u>	Heading cell – no response required	Heading cell – no response required
503.2 User Preferences	Partially Supports	The product follows system appearance, accent color, contrast and focus ring settings. Its text does not follow the macOS Text Size setting.
503.3 Alternative User Interfaces	Not Applicable	The product does not provide an alternative user interface that works as assistive technology.
